

Steel Closures

- Our steel closures are “Infinitely Recyclable.”
- Steel can be recycled over and over without losing its integrity.
- The steel we utilize contains 35% recycled content.

Plastic Closures

- Our lined plastic closures are recyclable in the # 5 PP (polypropylene), #2 HDPE or #4 LDPE stream depending on the type of resin used to manufacture the closure.
- Our unlined closures are recyclable in the #2 HDPE or the #4 LDPE stream, depending on the type of resin used to manufacture the closure.

Aluminum Closures

- Our aluminum closures are “Infinitely Recyclable.”
- Our aluminum ROPP closures are 100% recyclable in available aluminum recycling streams.

Please note that closure recycling percentages vary by geographic location and the corresponding recycling infrastructure in that area. Contact your local municipality for details about recycling specific products or materials.
